The British Columbian.

SATURDAY, JULY 18, 1868.

CANADIAN MAIL SUMMARY.

Our Canadian Exchanges are to the 6th June. Parliament was prorogued on the 22d May by the Governor-General, who took occasion to congratulate his Commons on the general prosperity which prevailed throughout the Dominion. It was pretty well understood that the North shore line would be decided upon for the Intercolonial Railway. A special Cabinet Council was to be held to settle the whole affair, immediately after which the Hon. John Rose and the Hon. Wm. McDougall would leave for England to make arrangements for raising the money necessary for the railway and the fortifications at Montreal and elsewhere. The bill reducing the salary of the Governor General from \$50,000 to \$32,000, passed by large majorities, nearly all the French members voting for it. The Governor General reserved it for the consideration of Her Majesty. It was understood that the policy of the Dominion with regard to its fisheries had received Imperial approbation. Under it a charge of \$2 per ton will be exacted from American vessels in Canadian waters, and all vessels found unprovided with a licence will be liable to seizure as prizes. A marine police is also to be established, composed of British and Colonial forces in equal proportions, for the purpose of enforcing the new regulations. Speaking of the general economy now being practised at Ottawa the *Hamilton Spectator* says: "There has not for a great many years in Canada been so decided and so general a feeling in favor of strict economy in the administration of the affairs of the country as at this moment. Each party is apparently desirous of out-vying the other in its efforts to retrench, and the Government of the Dominion, equally impressed with the general desire, is laboring, we are glad to know, steadfastly and earnestly to secure the same great result." It was said that a good deal of indignation was expressed on account of the refusal to issue a Commission for the trial of Fenian prisoners connected with the assassination of Mr. McGee. A few more arrests had been made, but nothing of importance had transpired. The prisoners were in good spirits and getting fat. M. Robert, late representative of the county of Megantic, has gone out into the Muskoka district, province of Ontario, in search of a location for over one hundred French-Canadians, who propose emigrating thither. The tablet in Desbaret's block, Ottawa, in memory of Mr. McGee, was uncovered on the morning of the 6th inst. It bears the inscription: "Here fell, on seventh April, 1868, by the assassin's hand, Hon. Thomas D. Argy McGee." Mr. Walter Stanley's report on the water supply for Montreal, is based upon the assumption that the city will soon have 200,000 inhabitants. The suggested extensions will cost about \$1,000,000. The salt business at Goderich is steadily expanding, several new wells having been opened. A salt deposit, believed to be of great thickness, has been discovered at Port Hope, where steps for opening a well were in progress. It was semi-officially stated that Lord Monck would shortly leave Canada, and that Earl Mayo would be his successor. It was also authoritatively stated that the Hon. Joseph Howe had been offered, and would in all probability accept, the Governorship of South Australia. It was reported that the Duke of Cambridge (Edinburgh?) intends visiting the Pacific Colonies in September next. Mr. Dawson, Civil Engineer, had reported on the route from Lake Superior to the Red River Settlement,

and the report had been laid before Parliament. Mr. Dawson recommends opening the line in the first instance in the least expensive way possible to be effectual, as preliminary to works of a more extended nature. The total distance from Thunder Bay, Lake Superior, to Fort Garry is 463 miles, comprising 332 miles of navigable water and 131 miles of land travel. Ninety miles of the latter would be between Fort Garry and the Lake of the Woods, where there is abundant means of transport, and 25 miles between Thunder Bay and Dog Lake, where horses and waggons could easily be provided. The principal part of the land travel would, therefore, be at each extremity, with navigable water between. Mr. Dawson estimates the cost of opening communication in this way at \$168,000, over and above the small appropriation of last year. He shows that the immediate result would be to transfer the trade of the North-West to Canada. The present cost of conveyance from York Factory, Hudson's Bay, to Fort Garry is about \$100 per ton, and from St. Paul, Minnesota, \$90 per ton; while the extreme cost from Lake Superior to Fort Garry, by the means suggested, would not exceed \$40 per ton. In addition to this saving of \$50 per ton in freight alone, the settlers would save 30 per cent. by purchasing their supplies in the principal markets of Canada, instead of buying them in the remote towns of Minnesota. The total trade of the territory is estimated by Mr. Dawson at \$4,000,000 annually. It is probable that this report will exert a decided influence upon the movements of the people of Canada in order to secure, at so very trifling an expense, so rich a prize. So much it be. By a Parliamentary paper recently published, it appears that the tonnage of steamers in Ontario and Quebec in 1865 was 42,788; in 1866 it was 44,583; and in 1867 it was 52,747. It was understood that the Hon. John H. Cameron had been offered a fee of \$10,000 to undertake the defence of Whelan. Five millions of dollars have been voted for the construction of fortifications at Montreal, Kingston, Toronto, Hamilton, and London or Paris. In order to encourage the building of iron ships on the St. Lawrence, arrangements have been made for granting a drawback upon all iron entering into the construction of composite ships. There seems to be an impression that the wooden ship era is passed. It appears from a report recently issued by the Montreal Board of Trade, that during last year 5,428 vessels, with a tonnage of 744,477, visited that port. There is at present 5,124 horse-power (water) in use in that city, affording direct employment to some 10,000 persons; but a scheme is on foot for securing an additional power of 4,500,000 horses, by means of damming the unnavigable channel of the Lachine Rapids. Should this gigantic scheme be carried out, of which there would appear to be every probability, Montreal will take rank as the first manufacturing city on the Continent. The Gulf fishing rights have been the subject of Congressional debate at Washington, and Mr. Pike proposes to settle the whole difficulty of jurisdiction by a simple resolution conceding to Americans the right to fish within a marine league of the shore, and vessels of war to be sent round to enforce that right. A summary mode, certainly, of settling an international question, or rather enacting international law. Even according to the best American writers on international law, the marine League which defines national jurisdiction over the sea is to be measured not from the shore line, but from a straight line connecting the headlands. Any other rule would be absurd, as applied to bays. Mr. Pike is a fresh-water fish, and must not claim to be authority upon questions of sea fisheries.

WHAT kind of Guns, Captain? Pop Gans? No, no, I mean "Guns's Family Physician, or Home Book of Health." It should be in every family. It has been the means of saving many lives. Those, especially, who reside at a considerable distance from a Physician should not be without this valuable work. G. C. Clarkson & Co. have plenty of them and sell them at \$8 50 each.

HOLLOWAY'S PILLS.—The Great Need.—The blood is the life, and on its purity depends our health, if not our existence. These Pills thoroughly cleanse this vital fluid from all contaminations, and by that power strengthen and invigorate the whole system, healthily stimulate sluggish organs, reverse overacted action, and establish order of circulation and secretion throughout every part of the body. The balsamic nature of Holloway's Pills commends them to the favor of debilitated and nervous constitutions, which they soon reassert. They dislodge all obstructions, both in the bowels and elsewhere, and are, on that account, much sought after for promoting regularity of action in young females and delicate persons, who are naturally weak, or who from some cause have become so.

S.T-1860-X.

A great French Physician says: "More than half the human race suffer from some defect in the system against changes of climate, weather and food. The great secret of health is to keep the condition of the stomach and blood regular and uniform, so that changes from heat to cold, from dry to damp, etc., cannot upset the machinery of the body, and breed disease."

Now it is a fact, positive and well known, that there is no such bulwark and assistant for the stomach as

PLANTATION BITTERS.

This splendid Tonic is now used by all classes of people for every symptom of a "Stomach out of order."

The secret of it is this: Plantation Bitters are certain to correct the juices of the stomach, set all its machinery at work, and enable it to resist and throw off the approaching danger. The tendency of the operations of Nature is always towards a cure; all she needs is a little assistance at the proper time. How much more reasonable and sensible it is to help her along with a gentle yet powerful Tonic, than to delay and weaken and defeat her curative processes with poisonous drugs and very mixtures which only stupefy and plant the seeds of disease and death.

Important Certificates.

"I owe much to you, for I verily believe the Plantation Bitters have saved my life."

"I have been a great sufferer from Dyspepsia and indigestion, and have been greatly benefited by their use. Thy friend, Mrs. G. C. Clarkson, Phil., Pa."

SATURDAY, JULY 18, 1868.

THE NORTH-WEST TERRITORY.

After months of feverish waiting, the Canadian people have at length got their answer from the Secretary of State. It was laid before Parliament on the 15th May, and reads as follows:—

DOWLING STREET, April 23, 1868.

"My Lord,—I have already acknowledged, on the 18th January, your lordship's despatches of the 21st December, transmitting a joint address from the Senate and House of Commons of Canada to Her Majesty, praying the annexation to Canada of Rupert's Land and the North-West Territory. Your lordship will have the goodness to inform the Senate and House of Commons that their address has been duly laid before the Queen. Her Majesty's Government will be willing to recommend a compliance with the prayer of the address as soon as they shall be empowered to do so, with a just regard to the rights and interests of Her Majesty's subjects interested in those Territories. They are advised, however, that requisite powers of government and legislation cannot, consistently with the existing charter of the Hudson's Bay Company, be transferred to Canada without any Act of Parliament. Before such an act can be obtained, it is necessary to consider the position of the Hudson's Bay Company. The Company have held a charter and exercised privileges conferred by it for 200 years, including the rights of government and legislation, together with the property of all the lands and precious metals; and various eminent law officers consulted in succession have all declared that the validity of this charter cannot easily be disputed by the Crown. I have, on behalf of Her Majesty's Government, called upon the Company to state the terms on which they would be prepared to surrender to the Crown whatever rights they have over the land and precious metals, including the rights of government, with the intimation that no present payment in money will be made to them, but that in the transference of their rights to Canada they might have a reservation made to them of defined portions of land and of a share of the future proceeds of land and precious metals of the territory, up to a certain fixed amount. I enclose copies of letters which have passed up to the present time between the Company and this Department on the subject. I propose to introduce a Bill into the Imperial Parliament with the view of authorizing any arrangement which may be effected on the basis thus indicated of defining the territory over which it extends, and authorizing subsequent transfer to the Canadian Government of rights and powers to be acquired by the Crown in respect to government and property, in accordance with the prayer of the address. With respect to the North-West Territory, the same obstacle did not exist to transfer the greater part by the Crown to Canada at the present time, subject to proper reservation of the rights and property of Her Majesty's subjects now settled therein, and for the protection of Her Majesty's native subjects; but I apprehend that while it remains separated from Canada by the Hudson's Bay Company's Territory, still under the Company's government, it will not be desired of Canada to undertake the government of this more remote country. A portion of the North West Territory immediately adjacent to British Columbia, I am of opinion it will be necessary for the public advantage to retain in possession of the Crown with a view to its incorporation with British Columbia."

It is scarcely surprising that the feeling produced by this dispatch is far from satisfactory. Still there is no denying that the dark cloud does exhibit a silvery lining. In the House the hon. Mr. Holton took the most unfavorable view of it, and asserted that the Duke had fairly slapped Parliament in the face, and humiliated it as no Parliament was ever humiliated before. On the other side, Sir J. A. McDonald insisted that instead of a humiliation it was a triumph. Imperial action had been secured, a thing steadily refused for years. The Imperial Government had not returned a negative reply to the Address, but had promptly undertaken to negotiate for the surrender of the Territory by the Hudson Bay Company. Mr. McKenzie, a very prominent member of the Opposition, took a middle view. The *Toronto Globe* has a leading article upon the subject, in which we think a too desponding view is taken. Our contemporary says:—"The whole tone of the Duke of Buckingham's despatch is more like what might have been expected from the Governor of the Hudson's Bay Company, than from a British Statesman at this time of day, and occupying the position which the Duke at present holds. He talks of the rights of that Company as unquestionable and very extensive. If they are so manifest, why could not the company, like any other corporation, seek its remedy by establishing these in ordinary course of law? If the Duke of Buckingham knows anything like what he ought to know on this subject, he must be aware that many lawyers of the first standing hold that the company has scarcely any rights under the charters of which so much is made. At any rate it is not his part to assume the position of the company's advocate, or to say that it should be treated more favorably than any other body of traders. This, however, is not all. The Duke not merely says the company must be satisfied before any steps are taken towards the opening up of the North-West territory, but he shadows forth an arrangement such as may well give it satisfaction indeed, seeing it virtually secures its perpetuation. All this is very tantalizing, though not different from what might have been expected. Wire-pulling is not abolished in Britain any more than on this continent, and the British Colonial Secretary in this case happens not to be the puller, but the pulled. It is at such a time as this in the history of British North America especially necessary that those who occupy the Colonial office should be Statesmen who can in some good measure appreciate the momentous character of the interests at stake, and can address themselves to the arrangement with the breadth of view, and the vigor and decision of action becoming those who are conversant with important national transactions, and not with the hesitancy, irresolution, and littleness of those who have no opinions of their own, but such as may have been suggested by interested partisans, or selfish but wealthy corporations, and who show that they are more at home in copying a register than in ruling an Empire, in pleading for an indefensible monopoly, than in arranging for the well-being of the inhabitants of the third of a Continent." For ourselves, we are disposed to indulge in a more hopeful view of the subject. Of course it is very annoying to discover that the nice little arrangement by which Canada was to have taken possession, leaving the company to prove its claims in the Courts of the country, has turned out a myth. It would undoubtedly have been more convenient to Canada to have proceeded in that way; and, what is of vital importance to us out here, the extension of the Dominion to the Pacific would very likely have been accelerated. But, one cannot always have things one's own way; and if the Imperial authorities display the most ordinary diligence in carrying to completion the negotiations and the promised legislation, all will be well. The evident irritation of the Canadians is perfectly excusable, for it is evident there is a screw loose somewhere. The 146th Section of the British America Act is perfectly consistent with the idea of transfer first and compensation afterwards, while it is difficult indeed to reconcile that clause with the other view.

AYER'S MEDICINES.

The peculiar taint or infection which we call SCROFULA lurks in the constitutions of multitudes of men. It either produces or is produced by an enfeebled, vitiated state of the blood, wherein that fluid becomes incompetent to sustain the vital forces in their vigorous action, and leaves the system to fall into disorder and decay. The scrofulous contamination is variously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The disease it originates takes various names, according to the organs it attacks. In the lungs, Scrofula produces tuberculosis, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the flesh" healthy, you cannot have scrofulous disease.

Ayer's Sarsaparilla is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in Ayer's American Almanac, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of AYER'S SARSAPARILLA, although it is composed of ingredients, some of which exceed the best of Sarsaparilla in alternative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital functions, and thus expels the distempers which lurk within the system or burst out on any part of it.

We know the public have been deceived by many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effectual than any other which has ever been available to them.

**AYER'S
CHERRY PECTORAL.**
The World's Great Remedy for
Coughs, Colds, Incipient Con-
sumption, and for the relief
of Consumptive patients
in advanced stages
of the disease.

This has been so long used and so uni-
versally known, that we need no more
than assure the public that its quality is kept
up to the best it ever has been, and that it
may be relied on to do all it has ever done.

AGRICULTURAL EXHIBITION.

1868.

The General Committee of the New
Westminster District Agricultural So-
ciety, having decided upon holding
an Exhibition during the first week
in October, now submit the following
List of Articles for which Prizes will
be given. They hope shortly to be
able to announce the amount of such
prizes.

All will be allowed to exhibit; but
only Subscribing Members will be eli-
gible to compete for prizes.

As it is desirable that the Exhibi-
tion should be rendered as complete
and attractive as possible, any products
of the Colony may be exhibited in
quantities smaller than those prescribed
in the list. Such articles will be
entitled to Honorable Mention, if ad-
judged worthy.

CEREALS.

1. Wheat, (Fall,) best, 2d and 3d best, 1 bushel, from not less than one acre.
2. Wheat, (Spring,) same conditions as Fall.
3. Oats, (Black,) best and 2d best, 1 bushel, from not less than one acre.
4. Oats, (White,) best, 1 bushel, from not less than one acre.
5. Barley, best and 2d best, 1 bushel.
6. Indian Corn, best and 2d best, 12 cobs, from not less than one acre.
7. Buckwheat, best, 1 bushel.
8. Peas, (Field,) best and 2d best, peck.
9. Peas, (Col'd,) " " " "
10. Beans, (Field,) best and 2d best, peck.
11. Rye, best sample.
12. Clover Seed, (Red,) best and second best, 1 lb.
13. Clover Seed, (White,) " " " "
14. Timothy Seed, best and 2d best, 1 lb.
15. Rye Grass, (Perennial,) best & 2d best, 1 lb.
16. Rye Grass, (Italian,) " " " "
17. The Best Variety of Cereals.

ROOTS & VEGETABLES

- Potatoes, Common White, best and 2d best of each, 20 lb.
- " Kidneys, " " " "
- " Blue, " " " "
- " Largest, " " " "
- Turnips, Swedes, best and 2d best, 20 lb.
- " Aberdeen, " " " "
- " White, " " " "
- Carrots, Red, best and 2d best, 1 dozen.
- Parsnips, White, " " " "
- Mangold Wurzel, Long red, best & 2d best, 5 lb.
- " Globe, " " " "
- Cabbage, Drumhead, best and 2d best, 10 lb.

HORTICULTURAL.

- Peas, in pods, best and 2d best, 2 quarts.
- Beans, " Dwarf, best & 2d best, 1 quart.
- " Runners, " " " "
- Tomatoes, " " " " " "
- Onions, Red, best and second best, 1 dozen.
- " White, " " " " " "
- Beets, Red & White, best and 2d best, 4 specimens.
- Pumpkin, best and 2d best, 1 specimen.
- Squash, " " " " " "
- Vegetable Marrow, best and 2d best, 2 specimens.
- Melons, best, " " " " " "
- Cucumbers, best, " " " " " "
- Cabbages, Early & Late, best & 2d, 1 specimen.
- " Red, " " " " " "
- Cauliflower, best and 2d best, 1 specimen.
- Kale, best and 2d best, 1 specimen.
- Celery, best and 2d best, 3 sticks.
- Hops, best and second best, 1 lb or vine.
- Tobacco, best, 1 specimen.
- Flowers, best, 1 bouquet.

FRUITS.

- Apples, (Fall,) best and 2d best, 12 specimens.
- " (Winter,) " " " " " "
- Pears, (Fall,) " " " " " "
- " (Winter,) " " " " " "
- Plums, " " " " " "
- Peaches, " " " " " "
- [Slipstone and Clingstone.]
- Quinces, best and 2d best, 1 dozen.
- Grapes, " " " " " "
- The Best Variety.

DAIRY PRODUCE.

- Butter, [Fresh,] best, 2d and 3d best, 1 fatful.
- " [Salt,] " " " " " "
- Cheese, " " " " " "
- Eggs, [Fowl,] " " " " " "
- " [Duck,] " " " " " "
- Fowls, [Of each variety,] best and 2d best, 1 pair.
- Ducks, best and 2d best, 1 pair.
- Geese, best, " " " " " "
- Turkeys, best and 2d best, 1 pair.

FISH.

- Salmon, [Spring,] best and 2d best, 1 barrel.
- " [Summer,] " " " " " "
- " [Preserved in tin or wood,] best and 2d best, 1 sample.
- Codfish, [Dried,] best, 1 sample.
- Oolabhuhs, [Dried,] best, 1 sample.
- " [Pickled,] " " " " " "
- Caviar, " " " " " "
- Isinglass, " " " " " "
- Fish Oils, [Of each,] " " " " " "

MISCELLANEOUS.

- Turpentine, best and 2d best, 1 sample.
- Lard, best, 5 Pounds.
- Bacon, " " " " " "
- Hams, " " " " " "
- Pickles, Jams, Jellies, and Preserves, best, 1 sample.
- Wines, best and 2d best, 1 sample.
- Spirits, " " " " " "
- Ale, Beer, and Cider, best, 1 sample.
- Mineral Specimens of all kinds.
- Fancy Needlework.
- Indian Manufactures, Curiosities and Relics.
- Flax, best, 1 sample.

The British Columbian.

SATURDAY, JULY 18, 1868.

THE OCEAN MAIL SERVICE.

Either our own Government is very unmindful of its duty or else the paternal Government has failed to make good certain promises. The last Session left the interests of our ocean mail service in the hands of the Executive, with the distinct impression that a very few months would suffice to have a first class mail service established between this colony and San Francisco, with a class of steamers calculated not only to carry our mail bags with safety and celerity, but what is of even greater importance, of a character to convey persons with due regard to cheapness, safety, and comfort, to our shores; and that Her Majesty's Government was prepared to pay one-half of any subsidy that might be required for the purpose. Now, what is the fact? We took occasion, the other day, to say a few words about the only steamer on the route. That steamer has since completed another voyage from San Francisco to our shores. It has just accomplished the marvellous feat of running eight hundred miles in eight days—being at an average speed of four miles and one sixth per hour! So much for the speed. A word about the attractive character of the ship in point of accommodations, etc. On this point it will only be necessary to refer to a Card recently published in the Victoria papers, and signed by all the passengers. In that Card the ship and her accommodations were denounced in no measured terms, and the passengers, some forty in number, pledged themselves to patronize any steamer that might be put on in opposition to the California. With such a condition of things it is surprising that we get no immigrants? Is not such an unsightly and disreputable bulk as the California a standing advertisement against the Colony? Does not that boat, as she lies at her dock, advertised to carry passengers to British Columbia in eight days, and with fare and accommodation declared to be unfit for human beings, and all for forty dollars, operate as a warning against any one attempting to reach our shores? The policy of her owners is perfectly clear. It is not their interest to encourage immigration to this Colony. The policy of our Government in quietly continuing to permit such a condition of things to prevail, is not so clear. To whine about the ways and means for procuring a different state of things is childish imbecility. Better a thousand times pay one hundred thousand dollars a year for the right sort of thing, than pay ten dollars a year for the present! With a first-class line of steamers running regularly between this Colony and San Francisco, and carrying freight and passengers at low rates, the amount of any subsidy which it would be necessary to pay would come back ten fold, nay, one hundred fold! What is there for such a line of steamers to do? Away with such croaking. Such a line would create traffic. Population, now completely barred out, would flow in; commerce would be roused out of its fatal lethargy, and a buoyancy would be imparted to every interest. What a pitiful sight! A magnificent colony, abounding in undisturbed, mineral wealth, sitting like an armed savage on his haunches, by the sea-shore, content to subsist upon what dead fish the tide may bring to his feet! Shame upon those in whose hands are our affairs! Shame upon ourselves for thus fecklessly "sucking our thumbs," dreaming away the best part of our lives in a state of pitiable and culpable inertia.

ANOTHER LUNATIC.—Mr. Coffey, of Yale, came down by the Reliance yesterday, having in charge an insane Spaniard who has been lodged in Jail. This makes the third lunatic within a very brief period. It is time the authorities were taking steps for making fitting provision for this class of subjects. If we were asked for an opinion we would say "Carey Castle" would make a suitable establishment for the purpose, and would recommend the removal of the Government to its old quarters, with that view.

ENGLISH MAIL SUMMARY.

Our English files are to the 6th ult. The Government proposes to erect a complete suite of public buildings, at an outlay of about three millions sterling. It is proposed that they shall be so arranged as to have all the branches of each department complete under its own roof; and it is intended that the public buildings shall, as a whole, be "defensible." The Times suggests Whitehall as the proper site. A new French loan of four hundred and forty millions of francs is wanted. The Emperor Napoleon found at his accession in 1851, a funded debt of 213 millions sterling; he raised it before 1864 to 492 millions. The total debt of the Empire at the close of last year was reckoned at 540 millions—less than the national debt of Great Britain by 235 millions; yet the conditions under which these French liabilities were contracted were so unfavorable that the annual interest comes within a million of our own. The French debt, both as to principal and interest, will shortly be raised to a level with that of the United States—a capital of 555 millions, with a charge of 28 millions. The Queen had again taken herself to her dear "Highland Home," and, according to the latest "Court Circular," was enjoying her wonted walks and rides in the picturesque country around "Balmoral Castle." Talking about the Queen and her "Highland Home," or, perhaps more correctly, her Northern retreat, the usual placidity of the Commons was somewhat ruffled, on the 22d May, by Mr. Reardon standing in his place and making the following announcement:—I beg to give notice that on Monday next I shall ask the First Lord of the Treasury whether it be true that Her Majesty the Queen has been compelled, through delicate health to retire from England during the remainder of this season; and, if so, whether it is the intention of Her Majesty's Government, out of consideration to Her Majesty's health, comfort and tranquillity, and in the interest of the Royal Family and of Her Majesty's subjects throughout the empire, and especially of this metropolis, to advise Her Majesty to abdicate? The announcement was met by loud and continued cries of "Order!" and "Chair!" from all parts of the House. The Speaker decided that the notice was not couched in respectful and Parliamentary terms, and could not be entertained by the House, whereupon the unfortunate Mr. Reardon said, amid loud cries of "Order!" and "Chair!"—I beg very earnestly to apologize to the House for putting a question in any form of words which is either unparliamentary or not strictly in accordance with the views of this House. Nothing can be further from my views, mind or heart than to do anything inconsistent with strict loyalty to Her Majesty. Very much space in the Times is occupied with the most able debates upon the Irish Church question. The following petition to the House of Lords was being signed by clergymen of the Church of England only:—"Your petitioners are deeply convinced that to maintain the present Established Church in Ireland as the national Church of that country is an injustice which legitimately offends the majority of the Irish people; and your petitioners therefore humbly pray your Lordships to adopt such measures as may appear best suited to remove the cause of offence." In the Commons, on the 5th June, Mr. Lamont was to have moved that the expense of ex-Governor Eyre's defence—for he is again threatened with prosecution on account of his acts in Jamaica—should be defrayed by Government, but gave way, as did all others, for Gladstone's Suspensory Bill. Mr. Lamont took occasion, however, to present a formidable petition, favorable to the object of his pending motion, signed by 76 Peers, 6 Bishops, 20 M.P.'s, 40 Generals, 36 Admirals, 400 Clergymen, 300 J.P.'s, and 30,000 private persons. In the House of Commons, on the 15th May, Sir C. O'Loglen, in Committee of Supply, advocated the policy of a permanent Royal residence in Ireland. In the course of his remarks, in alluding to the various Royal visits paid to Ireland, he said, he could not refer to the visit of Oliver Cromwell as that of an English monarch, nor

could James II., or William III. when in pursuit of James II., be said to have visited Ireland. Both Disraeli and Gladstone spoke in terms favorable to the spirit of the motion, after which the subject was allowed to drop. An occurrence took place during the first great debate on the Irish Church which has given rise to many a remark and newspaper paragraph at the expense of the Premier. The facts appear to be these. When Disraeli began his speech he was very much exhausted, and after a time he turned to a friend who sat beside him on the Treasury Bench and asked for a glass of brandy and water. Finding, it is to be presumed, the benefit of the first potation, he had it repeated, and before he had finished he drank three glasses of the intoxicating mixture. His speech at the beginning promised to be one of the finest ever delivered in the House of Commons, and members of all parties were warmed to enthusiasm in spite of themselves. The great orator however soon began to be almost incoherent, and moved by compassion for the Minister, the House cried, "Divide, divide!" Mr. Disraeli took the hint; but before he sat down he—in the most confused and excited manner—made the ridiculous charge against his great rival, Mr. Gladstone, viz. that he had entered into a formal alliance with the Ritualists and Papal party for the overthrow of the English Establishment! The House was somewhat disturbed by this scene, but as Mr. Disraeli's drinking had all been done under their own eyes, and the circumstance of his being in ill health being generally known, there was no disposition to treat what was really a misfortune as an offence. The Prime Minister left the House at 3:30 in the morning, tolerably "tight." When he came to himself towards noon of Saturday, he sent his private Secretary with messages and verbal explanations to the newspaper offices; but the mischief was done, the speech was in everybody's hand, the Popish conspiracy in everybody's mouth, and before night the scandal had flown over all England—a warning to all orators not to invoke the trencherous aid of the son of Jupiter!

FROM YALE.—The str. Reliance, Captain Irving, arrived from Yale yesterday. Amongst the passengers were Mr. J. R. Adams, of the Soda Creek Mills, and Mr. Sonay, of the Colonial Hotel, Soda Creek. These gentlemen drove down in a buggy, making the journey from Soda Creek to Yale in five days. Mr. Adams' new mill is now completed. With one run of stones it grinds at the rate of 2000 lbs an hour. Another run is to be put in, when it is calculated to grind 4000 lbs an hour, or at the rate of 480 bbls per day of 24 hours. The enlarged capacity of this mill and the great reduction in rates made by Mr. Adams, must result in good to the public. A great deal of rain has fallen recently in the interior, so much so that the roads have become somewhat miry. Mr. Spence has completed improvements on the trunk road and gets the credit of having done the work well. He has given out the contract for making a trail from Deep Creek to the Forks of Quesnel.

Our readers have observed that we rarely praise patent medicines, and that we advertise only the very best of them. But now, the remarkable recovery of Mrs. Rice, of Canastota, from her distressing and almost helpless scrofulous disease, which is known throughout the community, and unquestionably the effect of Ayer's Sarsaparilla, leads us to publish without reserve the remarkable efficacy of this medicine. We do this in the interest of the afflicted. Any remedy which can so effectually raise one from the dead, should be universally known; and we wish it may be universally as successful as it has been in the case of Mrs. Rice.—Daily Journal, Syracuse.

FOR YALE.—The str. Onward, Capt. Irving will leave for Yale this evening. The Onward has received a new shaft, and has undergone a thorough course of repair. It is to be hoped she will long be free from accident.

FROM VICTORIA.—The str. Enterprise, Capt. Swanson, returned from Victoria last evening, bringing a considerable number of passengers. The local news is not very important. II. M.S. Sparrowhawk had returned from the north with the officers and crew of the wrecked U.S. ship Sawance. The Captain fully exonerates Capt. Cooper from all blame. The Moneta case was finished on the 14th. The Judge reserved his decision, but Capt. Turpin was permitted to depart for San Francisco with the ship, upon depositing in Court bonds for the sum of \$5500. The steamer New World leaves to-day for San Francisco. The str. California sailed for San Francisco on Wednesday. Messrs. Mumford and Gamble, of the Telegraph Co. are up from San Francisco, in connection with the broken cable. They are the guests of the Governor. The ship Nazarine, from China, was towed over to Captain Stamp's Mill on Thursday, where she will take in a cargo of lumber.

A MOVE IN THE RIGHT DIRECTION.—We are always pleased to be able to chronicle any improvements or changes for the better in this thriving little city of ours. We have just heard of the amalgamation of two well-known Houses here viz. Messrs. Clute and Clarkson, who have entered into a Co-partnership, and are now prepared to furnish every description of Goods in the Dry Goods, Clothing, Boots, shoes, Grocery and Stationery lines, at very reasonable prices. We bespeak for them the liberal support of a discriminating public.

AN ILLUSTRIOUS GOD-FATHER.—We learn from our English exchanges that His Royal Highness the Prince of Wales has signified his wish to stand sponsor to the infant son of the Rev. H. M. Birch, Rector of Prestwich. Mr. Birch was formerly tutor to His Royal Highness, and is brother to the Hon. A. N. Birch, lately of this Colony.

TELEGRAPHIC SUMMARY.

European dates are to the 10th. The Irish Reform Bill passed the House of Lords. Both Houses of Parliament have voted a pension of £2000 a year to General Napier. He has been made a Peer under the title of Lord Napier of Magdala. A dinner was given by the American artist Bierstadt to Longfellow, Gladstone, Admiral Farragut and other distinguished persons were present. The English Journals publish the Tammany Hall platform. The Times thinks it contains the principles of practical repudiation, and that its adoption ensures Grant's election. Seymour's defect is considered certain by the London press generally. In a speech in the Corps Legislatif Barthelemy, Minister of Justice, declared that the spoliation of the Church and State was only a question of time. Minister Benst has written a sharp answer to the recent allegation of the Pope on the state of the religion of Austria, saying the intermeddling of the Pope with the domestic legislation of Austria is a violation of the dignity and independence of the Empire. Belgrade despatches of the 7th state that Nenabris, brother-in-law of Prince Kara Gorgebek has been executed for participating in the recent conspiracy.

Eastern States news is to the 13th. On the 10th a Committee from the Democratic Convention formally notified Seymour and Blair of their nomination. Both accepted the nomination. The Herald says the Democratic party has decided that Grant shall be the next President, as Seymour against Grant, amounts to the surrender and disbanding of the party. The World thinks Seymour stronger than Chase. It is stated that several politicians and members from Tammany Hall Convention are trying to induce Seymour to retire, and if he will not, it is proposed to run Chase or John Quincy Adams as a third candidate. Blair had a unanimous nomination for the Vice-Presidency. Washington specials of the 13th say that Seward has purchased Sonoma and Sinaloa from Mexico; also, negotiated with Burlingame for a treaty of commerce with China.

California dates are to the 14th. A terrible accident occurred at Oakland wharf, on the 4th. About 5 o'clock

in the evening a large number of people were going on board the steamer "El Capitan," when the chains by which the moveable wharf is hung gave way, precipitating between 100 and 150 persons into the water. Up to latest advices 10 bodies had been recovered, but it was uncertain how many were missing.

ADDRESS

TO THE

NERVOUS AND CEBILITATED

WHOSE

SUFFERINGS HAVE BEEN PRO-

TRACTED,

AND WHOSE CASES

REQUIRE PROMPT TREATMENT

TO RENDER EXISTENCE

DESIRABLE.

If you are suffering from any of the above, what effect does it produce upon your general health?

Do you feel weak, debilitated, easily tired?

Does a little extra exertion produce palpitation of the heart?

Does your liver, urinary organs, or your kidneys, frequently get out of order?

Is your urine sometimes thick, milky or floccy, or is it rusty on settling?

Or does a thick cream rise to the top?

Or is a sediment at the bottom after it has stood awhile?

Do you have spells of short breathing or dyspnea?

Are your bowels constipated?

Do you have spells of fainting or rushes of blood to the head?

Is your memory impaired?

Is your mind constantly dwelling on this subject?

Do you feel dull, listless, moping, tired of company, or of life?

Do you wish to be left alone, to get away from everybody?

Does any little thing make you start or jump?

Is your sleep broken or restless?

Is the lustre of your eye as brilliant?

The bloom on your cheek as bright?

Do you enjoy society as well?

Do you pursue your business with the same energy?

Are your spirits dull and flagging, given to fits of melancholy? If so, do not lay it to your liver or dyspepsia.

Have your restless nights? Your back weak, your knees weak, and have but little appetite and you attribute this to dyspepsia or liver complaint?

NOW, READER,

DISEASES BADLY CURED,

AND EXCESSES.

Are capable of producing a weakness of the generative organs. The organs of generation when in perfect health, make the man. Did you ever think that those bold, defiant, energetic, persevering, successful business men are always those whose generative organs are in perfect health? You never hear such men complain of being melancholy, of nervousness, of palpitation of the heart. They are never afraid they cannot succeed in business; they do not become sad and discouraged; they are always polite and pleasant in the company of ladies, and look you and them right in the face—none of your downcast looks, or any other monotonous about them. I do mean those who keep the organs inflamed by running into excess. These will not only ruin their constitutions, but also those they do business with or for.

How many men, from badly-cured diseases and excesses, have brought about that state of weakness in those organs that has reduced the general system so much as to induce almost every other form of disease—idiotcy, lunacy, paralysis, spinal affections, suicide, and almost every other disease which humanity is heir to, and the real cause of the trouble never suspected, and have doctored for all but the right one?

Diseases of this sort require a Diuretic.

HELMBOLD'S

FLUID EXTRACT BUCHU IS THE

GREAT DIURETIC,

AND IS

A CERTAIN CURE FOR

Diseases of the Bladder,

Kidney,

Gravel,

Dropsy,

Organic Weakness,

Female Complaints,

30 MOUTHS General Debility,

CURE IS AT HAND!
HOLLOWAY'S OINTMENT

Scorbutic Eruptions, as Sore Heads and Scrofulous Swellings.
If this powerful Ointment be well rubbed into the parts affected, all skin disease will be speedily overcome. It acts not by repulsion, but repulsion. It enters the system as self-entrained, and operates not locally only, but constitutionally purifying the whole system, neutralizing all depraved humors, and affecting a radical and complete cure. The Pills should be taken as an auxiliary to the Ointment, as they are so prepared to act in union with it, facilitating and confirming the conquest of the disease.

Diphtheria, Ulcerated Sore Throat and Quinsy.
The above complaints have for twenty years been treated with Holloway's Ointment and Pills with complete success. The cures have been so remarkable, speedy and numerous, that these often fatal diseases are more easily cured by these medicines, than even the common sore throat, if taken in time.

The Kidneys, Stones and Gravel.
In these complaints the Ointment almost acts like a charm, providing it is very effectually rubbed over the regions of the kidneys, which it will penetrate and give almost immediate relief, while the Pills should be taken according to the printed directions, when the most extraordinary cures may be effected by this means.

Bad Legs, Bad Breasts, Scrofulous Sores, and Glandular Swellings.
In such cases the Ointment operates surely and with a rapidity that resembles magic. It should be rubbed into the parts affected, after they have been washed with lukewarm water. The purifying and curative powers of this marvellous ointment have never failed. Any old sore, wound or ulcer, if treated with it, and in case of bad breasts, or milk fever, its action is wonderful. Glandular swellings may soon be reduced by following the printed directions.

The Action of the Heart. Dropsy.
The last named disease is commonly preceded by irregular action of the heart, and difficult respiration which symptoms are always severe, and ever go from bad to worse, unless proper means of cure are resorted to. In Holloway's unrivalled Ointment and Pills the dropical patient will find relief; the present relief derived from the use of these remedies is marvellously quick, and perseverance in the application of this famous Ointment invariably results in a cure. They act with such energy on the circulation and absorbent system, that the dropical fluid vanishes, and the sufferer finds all the oppressive symptoms daily decline, till natural health returns.

Gout and Rheumatism.
May be cured with the greatest certainty if large quantities of the Ointment be well worked into the complaining parts, and this perseveringly done for some time. It is no use to smear it on the skin only; it must be got into the system. Take as many Pills nightly as will act two or three times during the 24 hours; eschew the use of coffee, and all stimulants. When these complaints are leaving the system, the violence of the complaint frequently seems to increase.

Indiscretion of Youth.
Sore, ulcers and swellings can with certainty be cured if this Ointment be thoroughly rubbed around the complaint, and this perseveringly done for some time. The Pills must be taken according to the printed directions. The blood being in an impure state, perseverance is necessary. From humane motives letters of advice will be given gratuitously. To save carriage the Pills should be obtained in the neighborhood of the sufferer, and not from Holloway's Establishment.

Both the Ointment and Pills should be used in the following cases:—
Bad Legs, Chapped hands, Scalds, Sore Nipples, Sore Throats, Ulcers, Skin-diseases, Burns, Elephantiasis, Itch, Scrofulous Swellings, Bites of Mosquitoes, Fistulas, Scurvy, Sore-heads, Gonorrhea, Glandular Swellings, Tumors, Constipation, Liver Complaints, Dropsy, Rheumatism, Chilblains, Rickets, Yaws.

Sold at the establishment of Professor Holloway, 234, Strand, (near Temple Bar) London; and by all respectable Druggists and Dealers in Medicines throughout the civilized world, at the following prices:—1s. 1/6, 2s. 6d., 4s. 6d., 11s. 2s., any Price, each Pot.
There is a considerable saving by taking the larger size.
Directions for the guidance of patients in every disorder are affixed to each Pot.

FOR SALE.
SIXTY-FOUR acres of excellent land situate on the South bank of the Fraser River, nearly opposite the Camp. One-half of this land is open prairie, quite above high water mark, and covered with good grass.

Ayer's SARSAPARILLA,
Scorful and Scrofulous Diseases.
From Every Lobe, a well-known merchant of Oxford, Maine.
"I have sold large quantities of your SARSAPARILLA, but never yet one bottle which failed of the desired effect and full satisfaction to those who took it. As fast as our people try it, they agree there has been no medicine like it before in our community."
Eruptions, Pimples, Blotches, Pustules, Ulcers, Sores, and all Diseases of the Skin.
From Rev. Robt. Stratton, Bristol, England.
"I only do my duty to you and the public, when I add my testimony to that you publish of the medicinal virtues of your SARSAPARILLA. My daughter, for several years, had an afflicting humor in her ears, eyes, and hair for years, which we were unable to cure until we tried your SARSAPARILLA. She has been well for some months."
From Mrs. Jane E. Rice, a well-known and much-esteemed lady of Danville, Cape May Co., N. J.
"My daughter has suffered for a year past with a scrofulous eruption, which was very troublesome. Nothing afforded her relief until we tried your SARSAPARILLA, which soon completely cured her."
From Charles P. Gage, Esq., of the well-known Gage, Murray & Co., manufacturers of canned goods, Newbury, N. H.
"I had for several years a very troublesome humor in my face, which grew constantly worse until it disfigured my features, and became an intolerable affliction. I tried almost every thing a man could do of both sides and medicine, but without relief. I began to feel that I was a lost man. I immediately made up my mind, as you told me it might for a time, but in a few weeks I was cured. I began to form under the blotches, and continued until my face is as smooth as any body's, and I am without any symptoms of the disease. I only know of one person who has enjoyed health, and without a doubt owe it to your SARSAPARILLA."
Bryant's—General Debility—Purify the Blood.
From Dr. Robt. Stratton, Bristol, England.
"I have used your SARSAPARILLA in my family, for general debility, and for every kind of disease, with very beneficial results, and feel confident in recommending it to the afflicted."
From Hon. Henry Monroe, M. P., of Newcastle, C. W., a leading member of the Canadian Parliament.
"I have used your SARSAPARILLA in my family, for general debility, and for every kind of disease, with very beneficial results, and feel confident in recommending it to the afflicted."
From St. Anthony's Fire, Rose, Salt Rheum, Scaled Head, Sore Eyes.
From Hon. Henry Monroe, M. P., of Newcastle, C. W., a leading member of the Canadian Parliament.

HOLLOWAY'S PILLS

To Purify the Blood.
These Pills have been placed by the common consent of mankind at the head of all remedies for removing impurities from the blood, and cleansing all the organs of the body. They have saved thousands of years after years from falling a sacrifice to the effects of dyspepsia, indigestion, diarrhoea, constipation, liver complaints, &c., attended by various other diseases. Experience has proved that, the warnings of decreasing organic energy and vital decay, are restored and reinvigorated with speed and beneficial action in every organ throughout the system, by the restorative and exfoliating influence of these pills.

Female Complaints.
All disorders of the sex, and diseases in every organ pertaining to the life and health of woman, youthful or married or single, may be radically and quickly cured without risk or trouble, by a few doses of these Pills, taken according to the printed directions.

Indigestion with languor and want of energy.
When taking these Pills, rub Holloway's celebrated Ointment over the pit of the stomach, and over the region of the liver, on the right side under the ribs, and you will at once experience a change for the better in your system, spirits, appetite, strength, and energy. The improvement, though it may be gradual, will be thorough and lasting.

Dropsy.
The efficacy of Holloway's Pills in dropsy is extraordinary. They act with such peculiar effect upon the system, that the fluids arising from this diseased state are rapidly carried off and prevented from any further accumulation. The sufferer requires a buoyant spirit and a belief in a completely renovated condition, and it is indispensably necessary that the Ointment should be effectually rubbed into the complaining parts.

Stomach, Liver, Kidneys and Bowels.
Those who suffer from liver and stomach complaints, should rub the Ointment over the liver, on the right side under the ribs, and you will at once experience a change for the better in your system, spirits, appetite, strength, and energy. The improvement, though it may be gradual, will be thorough and lasting.

Complaints incident to Children.
All complaints of children may soon be cured if care be taken to purify their blood, and cleanse the stomach and bowels. A few doses of these famous Pills will immediately have the desired effect, particularly if carefully followed by taking the large size of these Pills, which they know would be injurious to themselves.

Holloway's Pills are the best remedy known in the world for the following diseases:—
Ague, Female Irregularity, Scrofula, or King's Evil, Rheumatism, Dropsy, Skin-diseases, Ulcers, Sores, and all Diseases of the Skin, Indigestion, Liver Complaints, Stomach Complaints, Bowel Complaints, Headache, Neuralgia, Toothache, Earache, Eye Complaints, &c., &c.

Sold at the establishment of Professor Holloway, 234, Strand, (near Temple Bar) London; and by all respectable Druggists and Dealers in Medicines throughout the civilized world, at the following prices:—1s. 1/6, 2s. 6d., 4s. 6d., 11s. 2s., any Price, each Pot.
There is a considerable saving by taking the larger size.
Directions for the guidance of patients in every disorder are affixed to each Pot.
